PROFILE

Final-year engineering student at **TEK-UP**, specializing in cybersecurity, certified in **PECB ISO/IEC 27001 Lead Implementer, RHCSA and PCAP**. Hands-on experience in security auditing, DevSecOps, application security, Linux and infrastructure security. Experience working with Jenkins, Docker, Kubernetes/K3s environments, web applications and Linux servers, including vulnerability analysis and security control automation. Seeking a **6-month internship starting January/February 2027** in cybersecurity, Cloud Security, DevSecOps, systems and network security, SOC or technical GRC.

CERTIFICATIONS

PECB ISO/IEC 27001 Lead Implementer

RHCSA – Red Hat Certified System Administrator

PCAP – Certified Associate Python Programmer

EDUCATION

Engineering Degree in Information Technology 2024 – 2027
Specialization: Cybersecurity — TEK-UP University, Tunis

Bachelor's Degree in Electronics, Electrical Engineering and Automation (EEA) 2021 – 2024
Track: Embedded Systems — ISSAT Sousse – Final-Year Project awarded Excellent

PROFESSIONAL EXPERIENCE

Cybersecurity Intern – Security Audit, DevSecOps & Infrastructure Security 06/2026 – 07/2026
Dot IT, Tunisia Cybersecurity, AppSec, Infrastructure & DevSecOps

- Security assessment of four environments: Node.js/React application, Jenkins CI/CD pipeline, Ubuntu/Debian servers and Kubernetes/K3s cluster.
- Execution and analysis of SAST/DAST security checks and vulnerability scans using Semgrep, SonarQube, Trivy, OWASP ZAP, Burp Suite and Nmap.
- Analysis of authentication mechanisms, JWTs, secrets, access controls, permissions, exposed services and system/network configurations.
- Security review of containers, images, Kubernetes components and CI/CD pipelines, including prioritization of identified vulnerabilities.
- Preparation of structured security findings including technical evidence, severity, impact and remediation recommendations.

Final-Year Internship – Python Development & Elasticsearch 01/2024 – 06/2024
Dot IT, Sousse Python, Flask, Elasticsearch, Linux

- Development of a web-based recommendation application using Python, Flask and Elasticsearch, integration of Machine Learning processing, functional testing and technical validation on Linux.

TECHNICAL SKILLS

Cybersecurity & AppSec : Security auditing, OWASP Top 10, SAST/DAST, Burp Suite, OWASP ZAP, Semgrep, SonarQube, Trivy, Nmap, vulnerability analysis and remediation

Cloud & DevSecOps : AWS IAM/VPC/EC2/S3, Jenkins, CI/CD, Docker, Kubernetes/K3s, Git/GitHub, Terraform (basics), container and pipeline security

Systems, Networks & SOC : Linux, Ubuntu, Windows, SSH, hardening, TCP/IP, Wireshark, Wazuh SIEM, log analysis, alerting, investigation, MITRE ATT&CK

GRC & Governance : ISO/IEC 27001, risk assessment, access controls, security documentation, severity assessment and remediation tracking

Development & Automation : Python, Bash, FastAPI, Flask, Elasticsearch, automation scripts and technical reporting

SELECTED CYBERSECURITY PROJECTS

Secure DevSecOps Pipeline — Integration of Semgrep, SonarQube, Trivy and OWASP ZAP into a Jenkins CI/CD pipeline; analysis of results and documentation of remediation actions before deployment.

SOC with Wazuh — Deployment of a SIEM environment, collection and analysis of Linux logs, configuration of alerting rules, correlation and investigation of security events.

Web & Infrastructure Security Lab — Reconnaissance and security auditing in a controlled environment using Nmap, Burp Suite and OWASP ZAP; analysis of exposed services, configurations and vulnerabilities.

LANGUAGES

French – Fluent | **English** – Professional / Technical Proficiency
